

**Kinglake Ranges  
Wilderness Camp**

# ***Bushfire Safety***

Kinglake Ranges Wilderness Camp is one of the safest forest based camps in Victoria from a bushfire perspective. Whilst the facility is in a high risk area as many camps are, it is the below four points that make the difference. KRWC is a fully ACA accredited campsite with all the required and audited processes that that accreditation entails, including emergency management plans. Note these key points :

1. We are one of the closest of all campsites to Melbourne being just 13min to arrive in Whittlesea in Melbournes Northern suburbs. As a result car or coach evacuation is very quick.
2. ALL KRWC buildings were built in 2011 to Bushfire Attack Level 29 - a very high standard!
3. Our safe haven area is just 400M away and is a 50 Hectare totally un-treed and year-round green turf (grass) farm.
4. We have a standing evacuation stanby plan with Panorama Coaches based in Diamond Creek about 35 min away. If required the coaches would be available on an hourly basis (at \$198/Hr min 4 Hrs) and we have an after hours operations manager contact to initiate that if required.

## Other measures/practices that relate to safety on hot days :

1. We subscribe to CFA alerts and have a monitor based in our kitchen at all times.
2. The temperature in Kinglake is usually 4 deg cooler than in Melbourne due to altitude
3. We conduct nearly all activities in shaded areas
4. We constantly remind participants to be hydrated and sun-smart
5. Our main buildings are fully air-conditioned
6. We have a pool for cooling off.
